What is a website?

A website is a collection of pages that displays information to any internet users that visits a location or domain on the world wide web.

Division 6 IT's websites are mainly created with HTML, CSS, PHP and MySQL web development languages which ensures that we can always create dynamic, flexible, fast and reliable websites.

A website needs a domain name and reliable hosting to function best.

What is Hosting?

Web Hosting is storage space on the internet where you store all the files the website needs to function properly.

Quick Personalized Domain Registration:

You can register any domain for only R170 per year. Domain setup is quick and takes about 30 hours to complete the whole process.

When choosing a domain name always make it easy to remember and spell.

What is a domain?

A domain is the name of your website that points to the files at your hosting for example: www.division6it.com

For more details visit: <http://www.division6it.com/domainregistration.php>

Costing Structure:

Costing is calculated in three groups:

1. **Development**
2. **Domain**
3. **Hosting**

Development is a once of amount paid for the development done on the website.

Domain is the "name" of the website for example - www.division6it.com - and is paid annually at a rate of R180.

Hosting is paid monthly or annually. If you prefer to pay annually you receive a 10% discount.

Example:

First month:	Development + Domain + Hosting
Second month:	Hosting
Third month:	Hosting
... etc.	
Twelve month:	Domain Renewal + Hosting
